

Aspiration pumps

The **Rocket Suction Pump** is a digital aspiration pump that provides smooth, low volume vacuum at pre-determined negative pressures, allowing simple, low turbulence oocyte recovery. It is designed with immediate vacuum response and cut-off, intuitive rotary control and blue LED vacuum display.

Protection filter

The **pump protection filter** is a hydrophobic protection filter designed to prevent any fluid from getting into the aspiration pump. It is single packed and sterile and the purpose is only to protect the aspiration pump.

Protection filter and connector

The pump protection filter fits the supplied luerlock connector intended to be mounted permanently on the air-intake valve of the aspiration pump.

The connector fits the following aspiration pumps:

- Craft aspiration pump
- Rocket Digital aspiration pump
- Cook Vacuum Pump
- Pioneer Pro-Pump

The pump protection filter eliminates the glass bottle used on the classic Craft suction pumps. Should always be exchanged in case full suction has been used.
