

# VITAVITRO COOLING BOX

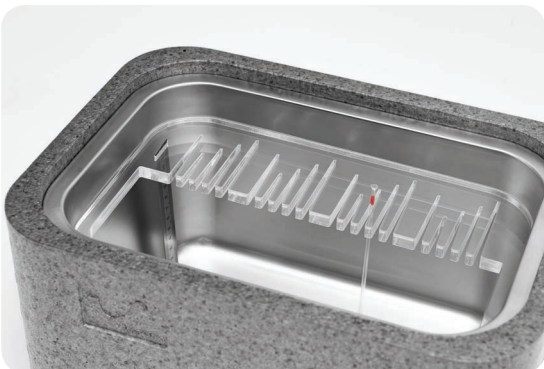

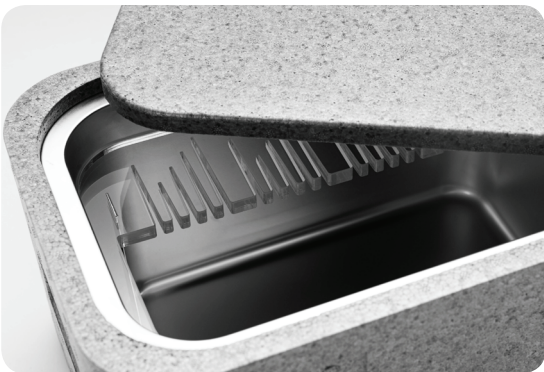

## SCOPE OF APPLICATION

As a liquid nitrogen container, used for fixing and transferring the storage container(s) during the vitrification or warming of gametes or embryos.

## COMPONENTS

- 1 **Shell:** Expanded polypropylene (EPP)
- 2 **Lining:** 304 stainless steel
- 3 **Shelf:** Acrylic

## FEATURES

### Safe and portable

The tank can be sterilized before use, reducing potential contamination.

### Liquid nitrogen-saving

The durable, compact and well-structured box is equipped with shelf for straw and good cryogenic properties. The cover plate can effectively delay the volatilization of liquid nitrogen.

### Cusmization

The slot of the shelf can be customized to meet the requirements of use.

## SPECIFICATIONS

Size: 344×245×187mm

Weight: 1.4kg
